In justice to our Machines as well as our customers we offer to keyen, the money in sixty days for any machine which does not wholly eatisfy the purchaser. This feature alone makes our machine worth much more than any other, as there is necessarily some risk in buying most machines.

A few of its superior qualities are these: it uses a straight needle; has great space under the arm; sews from two common spools, notifier being fastened and both in sight; turns ou hinges; is secured from dust and exposes no oil; its lever purchase is greater than that of any other machine; it has but two regulating secrems and both are above and in front; the driving wheel is entirely out side of the table; it requires no alteration for all varieties of work; it will certainly do neatly a greater variety or work than any Machina among the hundreds with which we are acquainted; its tension is perfect; it runs easily and still; it bothers notody; novices can manage it. None other will salisfy where it is known.

We can safel, say no jece of labor-saving machines they great any placed them in the very frony ranks. Inst these machines, and though our mannfacturing taillites have been largely increased we have not ver able to supply the demands during the past season. We can now fill all orders. We have added to our styles the BRIGHTSDE BLAKE & JOHNSON ABJUSTABLE HEMMER, and can now defy the world to produce butter unstruments for doing all kinds off awing and embrouders.
